

## DEVELOP A PYTHON SCRIPT

<b>Date</b>	<b>17-11-2022</b>
<b>Team ID</b>	<b>PNT2022TMID42908</b>
<b>Project Name</b>	<b>Project - IOT based safety gadget for child safety monitoring and notification</b>
<b>Maximum Marks</b>	<b>4 Marks</b>

### SCRIPT:

```
a=int(input()
)
b=int(input()
)
c=a+b
print ("The
sum is", c)
```

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 a=int(input())
2 b=int(input())
3 c=a+b
4 print("The sum is", c)
```

Below the editor, the Run console is visible, showing the execution of the script. The command executed is `C:\Users\HP\PycharmProjects\IBM\venv\Scripts\python.exe C:/Users/HP/PycharmProjects/IBM/main.py`. The output shows the program running successfully, displaying `The sum is 12` and `Process finished with exit code 0`.
